

FORMS AUTOMATION FOR FIELD SALES PROFESSIONALS

Field2Base's award winning field automation software provides the ultimate mobility solution for field sales professionals still utilizing paper forms in the field.

Managing customer interactions in the field with loose paper forms is an administrative headache and it costs companies thousands of dollars each month in overhead costs. Paper forms are riddled with errors and omissions and the process negatively impacts the overall customer experience. The tedious task of collecting and processing information on paper significantly delays A/R cycles and makes it makes managing the sales process from beginning to end incredibly difficult.

- ✓ Convert your existing paper forms into a digital format with limited end user training.
- ✓ Capture enhanced customer / product data such as photographs, barcodes, signatures, and more.
- ✓ Send captured data immediately to an email address, a web hosted database or your back office system using LAN, Wi-Fi, or Broadband Cellular.
- ✓ Use embedded GPS to facilitate smart routing.
- ✓ Remotely dispatch and complete work order tickets.
- ✓ Process Credit Cards and Checks remotely.
