- Secret shopper reports

Retail Solutions

Elevate your customer service with streamlined processes and real-time reporting.

Field2Base's mobile platform drives digital transformation for retail operations. By eliminating paper and replacing outdated processes, retailers gain real-time visibility into their business. Our platform also fully integrates into existing back end systems.

Features & Benefits

- Create digital forms that look exactly like your paper forms
- Convert field-based forms into custom applications with Javascript
- Capture enhanced data such as photos, barcodes, signatures, GPS, and video
- Guarantee compliance with business rules built directly into your forms
- Send and receive unlimited forms with a per-device licensing model
- Dispatch work orders to your mobile workforce as prefilled forms
- Exceed corporate standards for quality and safety
- Runs natively on Android & Apple mobile devices
- Works in a disconnected state (no internet required)
- 256bit AES and 128bit SSL encryption
- SAS70 and SSAE16 compliant
- 99.999% uptime
- Access our secure online portal to review, edit, and approve digital forms
- Receive data as PDFs, in a browser, or integrated with your IT system(s)
- Advanced workflow allows for intelligent, multistage routing
- Advanced analytics to receive up-to-the minute reporting
